

EE 480

CONTENT ASSESSMENT 2

NOTE: Answer the question with sufficient detail to receive higher credit. Once you're finished, submit the content assessment using the assignment upload form on the course website schedule.

Place your name and the date at the top of your answer sheet.

1. Give the command line interface (cli) commands to perform the following:
 - Create a folder in your home directory called “CA2”.
 - Move into the “CA2” directory.
 - Create a program file called “test.py”, or “test.c”, or “test.cpp” (depending on the programming language you want to use).
 - Edit your program file to display your first name, last name, and current time/date when it's executed.
 - Save your program and execute it at the command line.
 2. Provide a screenshot of the output of your program.
-
